---

## OVERVIEW

A driven Computer Science student with strong skills in full-stack and AI-based development, focused on building practical, high-impact solutions. Combines technical expertise with innovation and leadership to deliver efficient, real-world application.

---

## EDUCATION

### **Bachelor of Engineering (B.E.) (2022-2026)**

P E S College of Engineering (CS&E)

### **Senior Secondary Education (2020-2022)**

Sadvidya PU College, Mandya (PCMB)

### **Secondary Education**

Chinmaya English High School, Mandya

---

## SKILLS

**Backend Development** – Java, Spring Boot

**Web Development** – HTML, CSS, JavaScript, MERN Stack, REST API, GUI

**Database Management** – SQL

**Programming Languages** – C, Java

**Version Control & Tools** – Git, GitHub

**Data Analytics** – Power BI, Excel

**Generative AI** – Prompt-based content generation, ChatGPT API usage, AI-assisted development

**Prompt Engineering** – Task-specific prompt design, role-based prompting, multi-turn conversations

---

## PROJECTS:

### **START-UP IDEA GENERATOR AND VALIDATOR**

An AI-Based Startup Idea Generator & Validator is a system that generates innovative business ideas based on user inputs like domain, interests, or market trends. It then analyzes real-world data to evaluate the feasibility, competition, and demand for each idea. The system also suggests potential business models and improvements, helping users quickly identify viable startup opportunities.

### **ROSE: AI-DRIVEN RECEPTIONIST FOR COMPUTER CENTRE**

Developed a Python-based intelligent assistant, *Rose*, integrating speech and facial recognition, database connectivity, and a GUI to manage student operations, automate email services, and support administrative tasks in a computer training center.

### **EVENT MANAGEMENT SYSTEM**

Developed a responsive Event Management System using HTML, CSS, and JavaScript to streamline event scheduling and registration. Implemented interactive forms, dynamic event listings, and real-time updates for enhanced user engagement. Designed a clean, user-friendly interface with optimized performance across devices. Improved accessibility and usability through intuitive navigation and responsive design principles.
